SUMMARY

Computer Science Engineering graduate with hands-on experience in full-stack web development and machine learning. Proven ability to architect scalable applications using Python, Django, and modern frontend frameworks. Seeking software development opportunities to leverage technical expertise in building innovative solutions.

EDUCATION

APJ Abdul Kalam Technological University <i>Bachelor of Technology in Computer Science and Engineering</i> GPA: 7.42/10	2021 – 2025 Kannur, India
Rahmaniya HSS <i>Higher Secondary Education (HSE)</i> Grade: 96%	2019 – 2021 Kozhikode, India
NIR HSS <i>Secondary School Leaving Certificate (SSLC)</i> Grade: 90%	2018 – 2019 Kozhikode, India

SKILLS

Programming Languages: Python, Java, C, JavaScript
Frontend: HTML5, CSS3, React.js, Bootstrap, Tailwind CSS
Backend: Django, Node.js, Express.js, RESTful API
Databases: MySQL, SQLite, MongoDB
Tools: Git, GitHub, Postman
Machine Learning & Computer Vision: OpenCV, YOLOv8, CNN
Soft Skills: Problem Solving, Analytical Thinking, Logical Reasoning, Team Collaboration, Effective Communication

INTERNSHIP

I-NET Infotech Kochi, India
Python Full Stack Intern Aug 2025 – Nov 2025

- Developed PulseTrack, a role-based Hospital Management System using Python and Django, to streamline clinical workflows and reducing patient onboarding time by 40% through secure authentication and MVC architecture.
- Built FilmSpace, a scalable Movie and Series Management Platform using Python, Django, and SQLite, optimizing database queries for faster content retrieval and designing responsive interfaces using HTML5, CSS3, and Bootstrap.

PROJECTS

PulseTrack – Hospital Management System | [GitHub](#) August 2025 – November 2025
Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite

- Implemented a role-based hospital management backend using Django to streamlining clinical workflows and reducing patient onboarding time by 40%.
- Integrated secure authentication protocols using Django security modules, enforcing strict data access controls and ensuring 100% reliable appointment scheduling.

FilmSpace – Movie & Series Management Platform | [GitHub](#) August 2025 – November 2025
Python, Django, HTML, CSS, Bootstrap, SQLite

- Developed a scalable content management backend using Django, optimizing database queries to increase API data retrieval speed.
- Designed responsive client-side interfaces using HTML5, CSS3, and Bootstrap, ensuring cross-device compatibility and boosting overall user engagement.

Auto Vision – Real-Time Traffic Sign Detection & Alert System | [GitHub](#) March 2024 – April 2025
Python, Machine Learning, OpenCV, YOLOv8, CNN, CustomTkinter

- Engineered a real-time traffic sign detection pipeline integrating YOLOv8 and CNN models, achieving a 95% classification accuracy and automating alerts.
- Built a scalable live-monitoring GUI utilizing CustomTkinter, improving system responsiveness by 25% and drastically reducing manual monitoring time.
